MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real male liver-and-tan German Shepherd puppy with a chocolate-brown saddle, tan legs, a brown nose and amber eyes, wearing a light blue collar, shown at a different age in each clip as the scene describes. 0-5s (At 8 weeks): Living room in the afternoon, natural daylight from the window, a grey couch with a plaid throw. The puppy at 8 weeks is tiny and fluffy with floppy ears, sitting on the owner's lap on the couch, held securely with two hands, yawning. Sound: tiny yawn, owner says "8 weeks old". 5-10s (At 12 weeks): Same living room and grey couch, plaid throw, afternoon daylight. The puppy at 12 weeks fills the owner's lap, chewing on the corner of a soft toy, his paws noticeably bigger and his ears still soft. The owner's hand rests on his back. Sound: soft chewing, owner says "12 weeks". 10-15s (At 4 months): Same living room, afternoon light, grey couch. The puppy at 4 months sits on the floor in front of the couch, legs longer, ears starting to stand, his head now level with the seat cushion. He rests his chin on the cushion and wags. Sound: tail swishing on the rug, owner says "4 months". 15-20s (At 5 months): Same living room in afternoon daylight, plaid throw on the couch. The puppy at 5 months stands beside the couch, lanky with a deeper chest, ears fully up. He lifts a big paw onto the owner's knee asking for attention. Sound: owner laughs "5 months, what a goof". 20-25s (At 6 months): Same living room, afternoon light, grey couch. The young dog at 6 months sits tall beside the couch, his head above the cushions, long legs and upright ears, a sleek coat. He leans his whole side into the owner's legs, tail sweeping the rug. Sound: happy sigh, owner says "6 months, all grown up".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
