A Day in the Life of a 10-Week-Old Puppy

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

One full day with a 10-week-old puppy: an early potty break, breakfast, a short training game, an afternoon nap pile, and crate bedtime.

TIMELINE

0-5s	Dawn potty break
5-10s	Breakfast
10-15s	Training game
15-20s	Afternoon nap
20-25s	Crate bedtime

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 10-week-old male liver-and-tan German Shepherd puppy with a chocolate-brown saddle, warm tan legs and face, a brown nose, light amber eyes, fluffy soft puppy coat, oversized paws and floppy ears, wearing a small light blue collar. 0-5s (Dawn potty break): Backyard at early dawn, cool grey-blue light, dewy patchy grass, a wooden fence. The owner's slippered feet stand on the grass while the puppy sniffs around a small spot, squats briefly to pee, then trots back with his tail wagging. Sound: early birds, quiet neighborhood, owner whispers "good potty". 5-10s (Breakfast): Kitchen in the early morning, ceiling light on, beige tile floor. The owner's hand sets down a small bowl of soaked puppy kibble. The puppy dives in eagerly, ears flopping into the bowl, tail swinging. The bowl slides a little across the tile as he eats. Sound: bowl clinking, crunching, coffee maker gurgling. 10-15s (Training game): Living room in the late morning, natural daylight, light grey rug. The owner's hand lures the puppy with a tiny treat, and he wobbles into a sit, butt landing a bit crooked. He gets the treat and a gentle scratch on the chest. Sound: owner says "sit, yes!", soft crunch. 15-20s (Afternoon nap): Living room in the afternoon, soft daylight through curtains, a fleece blanket on the rug. The puppy is sprawled flat on his back, legs splayed, round belly up, deeply asleep. The owner's hand lightly rests on the blanket beside him. Sound: tiny snores, a clock ticking, birds outside. 20-25s (Crate bedtime): Bedroom at night, a single bedside lamp on, a wire crate with a soft blanket and a plush toy. The puppy steps into the crate, turns once and curls up, and the owner's hand gently closes the crate door and dims the lamp. Sound: blanket rustle, soft sigh, owner whispers "goodnight, little man".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Dawn potty break

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
