Thank You for Following the Puppies Hub

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A heartfelt thank-you video: the puppy waves a paw, carries a toy to the camera, sits for a treat, plays a quick game and naps, celebrating 100 videos with the followers.

TIMELINE

0-5s	Hello paw
5-10s	Bringing a toy
10-15s	Sit for treat
15-20s	Quick play
20-25s	Thank-you nap

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 10-week-old male liver-and-tan German Shepherd puppy with a chocolate-brown saddle, warm tan legs and face, a brown nose, light amber eyes, fluffy soft puppy coat, oversized paws and floppy ears, wearing a small light blue collar. 0-5s (Hello paw): Living room in the morning, soft natural daylight, light grey rug, a grey couch. The puppy sits facing the camera, and when the owner's hand reaches out he lifts one oversized paw into it, a little shakily, as if saying hello. Sound: quiet room, owner says "say hi to everyone". 5-10s (Bringing a toy): Same living room, morning daylight. The puppy trots toward the camera carrying a small plush bone toy, drops it right in front of the lens on the rug, and sits back with his tail sweeping side to side, looking up. Sound: tail swishing, owner laughing "that's for you". 10-15s (Sit for treat): Kitchen in the late morning, daylight through the window, beige tile. The owner's hand holds up a small puppy treat, the puppy sits neatly, and the owner gives it with an open palm. He gently takes it and wags. Then he licks his lips. Sound: owner says "good sit", soft crunch. 15-20s (Quick play): Backyard at midday, natural overcast daylight, patchy lawn and a wooden fence. The owner tosses a soft rope toy a short distance, and the puppy bounds after it with his ears flopping, then trots back holding it proudly. He drops it at the owner's feet. Sound: paws on grass, birds, owner cheering "100 videos!". 20-25s (Thank-you nap): Living room in the early evening, warm lamp light, a fleece blanket on the rug. The puppy curls up beside the plush bone toy, gives a sleepy look to the camera and closes his eyes. The owner's hand gently strokes his head. Sound: soft breathing, owner whispers "thank you for following us".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Hello paw

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
